

SUMMARY

Gemal is an experienced consultant who joined Regeneris shortly after completing his MSc in Financial Economics at the University of Manchester. As a trained economist, Gemal is adept at assembling, analysing and evaluating evidence from a wide-range of sources in order to identify trends and relationships. Gemal has experience across the broad spectrum of Regeneris' work having been involved in many economic impact, strategy and evaluation projects.

SKILLS AND EXPERIENCE

SECTOR STUDIES

Gemal has worked on a number of sector studies and strategies. He was the lead consultant on the Inward Investment Study for the Leeds City Region and has more recently been involved in sector work for Tees Valley and Carlisle. He is adept in drawing out the specialised strengths of an economy and drilling down into sub sectors to identify challenges and drivers which inform policy decisions.

LAND AND PROPERTY

Gemal has gained a wide range of experience in Land & Property work. He has worked extensively on a number of Employment Land Reviews and Housing Need Assessments which have given him an over-arching view of the planning system and the impacts of land allocation. Gemal uses his wide range of skills to draw on a variety of sources to inform a comprehensive analysis of the local and wider area using a combination of widely recognised government statistics and more fine grained investigative analysis of the local area to sense check and triangulate.

ECONOMIC AND SOCIAL IMPACT

Economic & Social Impact: Gemal has worked on a variety of socio-economic impact assessments for a range of studies covering higher education institutions, land & property schemes and large companies. Most recently, he has helped assess the economic and social impact of large corporate institutions such as Alstom, United Utilities and the Institute of Cancer Research. He has also worked on transport scheme appraisals and projects, considering a range of economic and user benefits. Gemal has a good understanding of HMT's Green Book and the Department for Transport's WebTAG guidance.

RESEARCH

Building on his strong academic background, Gemal has been the lead on a number of research projects at Regeneris. Using his experience in advanced statistics and econometrics, Gemal has led a team of researchers in analysing the socio-economic characteristics and price sensitivities of the housing market.
