

SUMMARY

Jay joined Regeneris as a Consultant in 2015, having spent the previous two years working within the Policy Unit for the Falkland Islands Government on a range of socio-economic projects, the collation of national statistics and policy research and reform. Prior to this Jay worked in Strategic Planning for Trafford Council, specialising in GIS, policy research and data analysis. He has strong quantitative and qualitative analysis skills with experience in public consultations, socio-economic research and data modelling.

SKILLS AND EXPERIENCE

LAND AND PROPERTY

Whilst at Regeneris, Jay has specialised in Land and Property projects within London and in particular Environmental Impact Assessment (EIA). Jay has compiled the socio-economic chapters for a number of EIAs, which have been submitted alongside major planning applications for high profile, large scale developments such as the 10,000+ home mixed use development at Barking Riverside and the redevelopment of Elephant & Castle Town Centre. He is experienced in community infrastructure analysis and assessing the economic impact of major developments, having completed a number of case making reports in London and the South East.

SOCIO-ECONOMIC ANALYSIS

Jay has an array of experience in analysing detailed socio-economic data. He has knowledge of all relevant national datasets which help build a picture of current economic strengths and weakness in an area looking at; employment, labour market skills, business base, housing and deprivation. Jay has compiled large and detailed socio-economic baselines for a number of strategies and local economic assessments such as Greater Essex Economic Commission and Milton Keynes Local Economic Assessment.

EVALUATION

Jay has worked on a number of evaluations across a range of interventions including business support and regeneration projects. He lead on the delivery review for the evaluation of the ERDF enhancement to the GrowthAccelerator programme in the North West and East & West Midlands. Jay has recently played a key role in the evaluation of a high profile enterprise support programme funded by the Mayor's Regeneration Fund in North London on behalf of the Greater London Authority.

ECONOMIC IMPACT APPRAISAL AND ASSESSMENT

Jay has worked on a number of economic appraisals for Local Enterprise Partnerships across England, helping assess business cases for public sector funding. He is also experienced in economic case making having helped develop economic cases on behalf of local authorities across East and West Midlands. Jay is also familiar with HM Treasury Green Book techniques and guidance when preparing and appraising economic cases. He has also worked on a range of economic impacts assessments for both public and private sector clients. Using industry standard guidance Jay has estimated the socio-economic benefits generated by largescale developments in London and the South East.
